Dr. Brian Slator  
Department of Computer Science  
North Dakota State University  
Fargo, ND 58105

Dear Dr. Slator:

I enthusiastically support and agree to provide full cooperation with the NSF-CCLI proposal, "Teaching with Immersive Virtual Archeology," (Slator and Clark, PI's).

As per your request, the NDSU Center for Science and Math Education is prepared to administer the financial and dissemination needs of this project by, in particular, accepting licensing orders as they are placed, arranging for storage and delivery of materials as they are ordered, and operating as a continuous point of contact capable of facilitating communication between potential customers and project participants in the event of system problems.

Yours sincerely,

Donald P. Schwert  
Professor of Geology  
Director, NDSU Center for Science & Mathematics Education
